

# WHITEPAPER

---

## *Pekka Inu*

---

Pekka Inu is a token built on Binance Smart Chain network. It was created to be one of the best and biggest crypto communities, Our goal is to provide generational wealth to all of our loyal holders, You're getting rewarded in BNB for holding and your \$PKA balance is increasing every time a transaction is made.

## Our Feature

---

### Passive Income

Holders will earn 2% \$PKA and 4% BNB by holding.

### Locked Liquidity

The liquidity has been locked properly, solidifying the overall security of the project.

### Community Based

A good project stands upon a great community, therefore polls will be used to help make decisions for the project.

### Dependable Contract

The smart contract of the project has been fully audited.

### Automatic Liquidity & Locked

Our Smart contract deposits 4% from every transaction as \$PKA and \$BNB into a liquidity pool. A liquidity pool always contains a pair of tokens. A bigger liquidity pool will provide more stability to \$PKA price.
